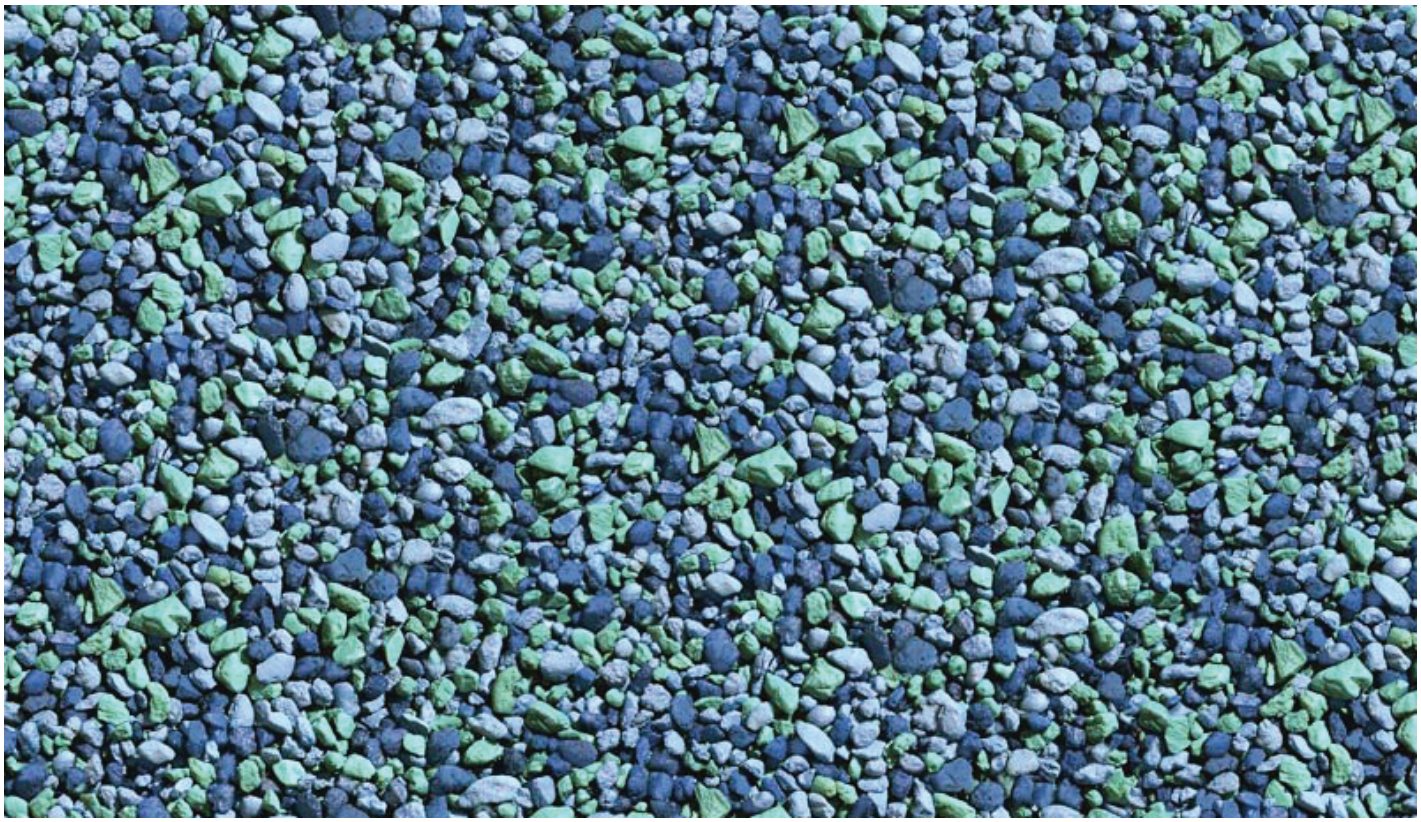
HERMIT SUBSTRATE™ Gravel



BLUE LAGOON TERRARIUM SUBSTRATES
Hermit Carb Sands - Hermit Crab Substrates - Hermit Habitat®

Characteristics of Hermit Habitat® Natural Terrarium Sands:
- A significant source of calcium for a healthier hermit crab
- 100% Digestible Calcium Carbonate
- Silica & Phosphate Free
- Natural Odor Neutralizer
- Creates An All Natural Habitat
- Non Toxic Colored Pigments
- Creates a unique and colorful environment

Recommended Uses:
Terrariums, Hermit Crabs, Aquariums, Ponds, Gardens, Potted Plants, Ash Trays, Vases & Crafts and Hobbies

Directions:
Add ProCalcium Hermit Sand at approximately 1-3 inches [2.5-7.6cm] deep creating an undulating effect. Scoop debris weekly and replace sand every 4 to 6 months to prevent toxicity.
